[DeinTeich.de](#)
Teich Pool Dach

This specially designed GRP pool was coated with the [DeinTeich.de premium-PLUS set](#) with epoxy resin, glass fabric and polyurethane top coat.

For the pool made of GRP (glass reinforced plastic), the [HP-E80FS epoxy resin](#) was first applied as a primer to the concrete substrate.

This was followed by the laminate, consisting of the [HP-E30TLS laminating resin](#) and three layers of [HP-B320/635E glass fabric](#).

This gives the GRP pool the required strength and stability.

In the final step, the [HP-PUR-PLUS polyurethane top coat](#) was used for the colored top layer (RAL 7035-light grey).

Whether you want to build a GRP garden pond, swimming pond or whirlpool yourself - [DeinTeich.de](#) offers the right coating set for your project!
